EXPERIENCE

PRODUCTION SUPPORT/QUALITY ASSURANCE ENGINEER

The Bankers Bank

2023-Present

Production Support
- **Provided top-tier customer service and technical support**, frequently utilizing SQL and SQL Server to ensure seamless software operation and minimize downtime.
- **Identified, analyzed, and resolved production issues**, enhancing software stability and performance while educating customers on proper software use to reduce support requests.

Quality Assurance
- **Developed and maintained an automation suite** using Selenium, C#, Object-Oriented Programming, and Visual Studio, significantly reducing manual testing efforts and improving test accuracy.
- **Designed, implemented, and executed automated test scripts** within the CI/CD pipeline, ensuring comprehensive test coverage, early defect detection, and faster release cycles.
- **Collaborated with development and QA teams** to identify and resolve bugs, conducted code reviews, and documented test plans and results, enhancing software quality and fostering continuous improvement.

Software Development
- **Refactored all configuration files for a large web application**, improving maintainability and performance.
- **Created and implemented configuration transform files using XML**, enabling seamless environment-specific configurations and streamlined deployment processes.

Personal Projects
- **Gained experience with ASP.NET Core and MVC**, applying the Model-View-Controller architectural pattern and utilizing C# in development projects.
- **Constructed front-end applications** using JavaScript and React framework.
